

A

Absolute differentiation 120
 Absolute scalar field 44
 Absolute tensor 46, 48
 Acceleration 121, 190, 193
 Addition of systems 6, 53
 Addition of tensors 53, 62
 Adherence boundary condition 294
 Aelotropic material 245
 Affine transformation 86
 Airy stress function 261
 Almansi strain tensor 229
 Alternating tensor 6,7
 Ampere's law 176, 300
 Angle between vectors 80, 82
 Angular momentum 218, 292
 Angular velocity 202
 Arc length 61, 67, 133
 Associated tensors 78
 Axis of symmetry 247

B

Basic equations elasticity 236, 253, 270
 Basic equations for a continuum 236
 Basic equations of fluids 281, 286
 Basis vectors 49
 Beltrami 259
 Bernoulli's Theorem 292
 Biharmonic equation 189, 266
 Bilinear form 97
 Binormal vector 130
 Bipolar coordinates 73
 Boltzmann equation 302,306
 Boundary conditions 255, 294
 Bulk modulus 251
 Bulk coefficient of viscosity 285

C

Cartesian coordinates 42, 67, 83
 Cartesian tensors 84, 87, 226
 Cauchy stress law 216

Cauchy-Riemann equations 293
 Christoffel symbols 108
 Circulation 292
 Codazzi equations 139
 Coefficient of viscosity 285
 Cofactors 24, 26, 32
 Compatibility equations 256, 257, 259
 Completely skew symmetric system 30
 Compound pendulum 197
 Compressible material 232
 Conic sections 166
 Conical coordinates 74
 Conjugate dyad 51
 Conjugate metric tensor 36, 77
 Conservation of angular momentum 218, 295
 Conservation of energy 295
 Conservation of linear momentum 217, 295
 Conservation of mass 234, 295
 Conservative system 194, 297
 Constitutive equations 243, 250, 281
 Continuity equation 106, 287
 Contraction 6, 53, 63
 Contravariant components 36, 45
 Contravariant tensor 45
 Coordinate curves 37, 67
 Coordinate surfaces 37, 67
 Coordinate transformations 37
 Covariant components 36, 47
 Covariant differentiation 113
 Covariant tensor 47
 Cross product 11
 Curl 21, 162
 Curvature 63, 131, 134, 149
 Curvature tensor 135, 145
 Curvilinear coordinates 66, 81
 Cylindrical coordinates 18, 42, 68

D

Deformation 221
 Derivative of tensor 108
 Derivatives and indicial notation 18, 31
 Determinant 10, 24, 31, 61
 Diffusion equation 303
 Dilatation 233
 Direction cosines 85
 Displacement 222
 Distribution function 302
 Divergence 21, 161
 Divergence theorem 24
 Dot product 5
 Double dot product 52, 64
 Dual tensor 99
 Dummy index 4, 5
 Dyads 50
 Dynamics 190

E

e Permutation symbol 6, 7, 12
 ϵ - δ identity 12
 Eigenvalues 182, 189
 Eigenvectors 182, 189
 Einstein tensor 156
 Elastic constants 248
 Elastic stiffness 242
 Elasticity 211
 Elliptic coordinates 72
 Elliptical cylindrical coordinates 71
 Enthalpy 297
 Entropy 299
 Epsilon permutation symbol 82
 Equation of state 299
 Euler number 293
 Euler-Lagrange equations 195
 Eulerian angles 203, 209
 Eulerian form 287
 Eulers equations of motion 195,205

F

Faraday's law 176, 300
 First fundamental form 133
 Fourier law 297, 299
 Free indices 3
 Frenet-Serret formulas 131, 193
 Froude number 293
 Fluids 281

G

Gas law 300
 Gauss divergence theorem 24
 Gauss equations 138, 153
 Gauss's law for electricity 166, 297
 Gauss's law for magnetism 166, 297
 Gaussian curvature 137, 151
 Geodesics 141, 146, 157
 Geodesic curvature 134, 140
 General tensor 50
 Generalized $\epsilon - \delta$ identity 83, 104
 Generalized Hooke's law 242
 Generalized Kronecker delta 13, 31
 Generalized stress strain 242
 Geometry in Riemannian Space 80
 Gradient 20, 160
 Gradient basis 39
 Green's theorem 24
 Group properties 41, 55
 Generalized velocity 121
 Generalized acceleration 121

H

Hamiltonian 209
 Heat equation 3032
 Hexagonal material 247
 Higher order tensors 50, 92
 Hooke's law 212, 242, 252
 Hydrodynamic equations 292

I

Ideal fluid 283
Idemfactor 51
Incompressible material 232
Index notation 1, 2, 14
Indicial notation 1, 2, 14
Inner product 54
Inertia 30
Integral theorems 24
Intrinsic derivative 120
Invariant 44
Inviscid fluid 283
Isotropic material 247, 248
Isotropic tensor 104

J

Jacobian 17, 30, 40, 127

K

Kronecker delta 3, 8, 13, 31, 75
Kinetic energy 201
Kinematic viscosity 302

L

Lagrange's equation of motion 194, 199
Lagrangian 209
Laplacian 174
Linear form 63, 96
Linear momentum 209, 287
Linear transformation 86
Linear viscous fluids 284
Lorentz transformation 57
Lorentz relation 188
Lame's constants 251

M

Magnitude of vector 80
Material derivative 223, 288
Material symmetry 244
Maxwell equations 176
Maxwell transfer equation 307
Maximum, minimum curvature 130, 140
Mean curvature 136, 151
Metric tensor 36, 65
Meusnier's Theorem 150
Mixed tensor 49
Mohr's circle 187
Moment of inertia 30, 186, 201
Momentum 217, 218
Multilinear forms 96, 97
Multiplication of tensors 6, 53

N

Navier's equations 254
Navier-Stokes equations 288, 290
Newtonian fluids 286
Nonviscous fluid 283
Normal curvature 134, 135
Normal plane 191
Normal stress 214
Normal vector 130, 132
Notation for physical components 92

O

Oblate Spheroidal coordinates 75
Oblique coordinates 60
Oblique cylindrical coordinates 102
Order 2
Orthogonal coordinates 78, 86
Orthotropic material 246
Outer product 6, 52
Osculating plane 191

P

Parallel vector field 122
 Pappovich-Neuber solution 263
 Parabolic coordinates 71
 Parabolic cylindrical coordinates 70
 Particle motion 190
 Pendulum system 197, 210
 Perfect gas 283, 299
 Permutations 6
 Phase space 302
 Physical components 88, 90
 Piezoelectric 300
 Pitch,roll, Yaw 210
 Plane Couette flow 301
 Plane Poiseuille flow 302
 Plane strain 260
 Plane stress 261
 Poisson's ratio 212
 Polar element 273
 Polyads 50
 Potential Energy 193
 Pressure 283
 Principal axes 183
 Projection 35, 92
 Prolated Spheroidal coordinates 73
 Pully system 195, 208

Q

Quotient law 55

R

Radius of curvature 130, 136
 Range convention 2, 3
 Rate of deformation 281, 287
 Rate of strain 281
 Rayleigh impulsive flow 302
 Reciprocal basis 35, 38
 Relative scalar 127
 Relative tensor 50, 121
 Relative motion 202
 Relativity 151
 Relative motion 155

Reynolds number 293
 Ricci's theorem 119
 Riemann Christoffel tensor 116, 129, 147, 154
 Riemann space 80
 Rectifying plane 191
 Rigid body rotation 200
 Rotation of axes 56, 85
 Rules for indices 2

S

Scalar 40, 44
 Scalar invariant 44, 62, 105
 Scalar potential 177
 Scaled variables 293
 Second fundamental form 135, 145
 Second order tensor 49
 Shearing stresses 214
 Simple pulley system 195
 Simple pendulum 196
 Skew symmetric system 3, 31, 51, 62, 105
 Skewed coordinates 60, 102
 Space curves 130
 Special tensors 64
 Spherical coordinates 18, 44, 58, 69, 194
 Stokes flow 303
 Stokes hypothesis 285
 Stokes theorem 24
 Straight line 60
 Strain 218, 225, 231
 Strain deviator 279
 Stress 215
 Stress deviator 279
 Strong conservative form 298
 Strouhal number 293
 St Venant 258
 Subscripts 2
 Subtraction of tensors 49, 62
 Summation convention 4, 9
 Superscripts 2
 Surface 62, 131
 Surface area 62

S

Surface curvature 149
Surface metric 125, 133
Sutherland formula 285
Symmetric system 3, 31, 51, 101
Symmetry 243
System 2, 31

T

Tangential basis 36
Tangent vector 130
Tensor and vector forms 40, 150
Tensor derivative 141
Tensor general 50
Tensor notation 92, 160
Tensor operations 6, 53
Thermodynamics 299
Third fundamental form 136
Third order systems 30
Toroidal coordinates 75, 103
Torus 124
Transformation equations 17, 37, 86
Transitive property 46
Translation of coordinates 84
Transport equation 302
Transposition 6
Triad 50
Trilinear form 98
Triple scalar product 15

U

Unit binormal 131, 192
Unit normal 131, 191
Unit tangent 131, 191
Unit vector 80, 105

V

Vector identities 15, 20, 315
Vector transformation 45, 47
Vector operators 21, 175
Vector potential 188
Velocity 91, 121, 190, 193
Velocity strain tensor 281
Viscosity 284
Viscosity table 285
Viscous fluid 283
Viscous forces 288
Viscous stress tensor 285
Vorticity 107, 292

W

Wave equation 255, 269
Weighted tensor 48, 50, 127
Weingarten's equation 138, 153
Work 193

Y

Young's modulus 212
